Self Compacting Concrete

High Performance Concrete

CEMEX Evolution™ Self-compacting concrete is gradually becoming the preferred formulation worldwide for many applications such as foundations, floors, walls and complex structures. It combines great strength and superb finishes with the opportunity to make serious project productivity improvements, advances in health & safety and in sustainability.

Suitable for

- Columns
- Slab
- Heavily reinforced elements
- Deep Pours
- Complex Shapes
- ICF (Insulated Concrete Forms)

Advantages

- Easily placed
- Reduced labour
- Virtually self levelling
- Enhanced workability and excellent early strength
- No compaction needed

Features & Benefits

Easy placed

- No compaction necessary
- Gives a smooth surface that requires minimal further finishing.
- Self-leveling reducing placing time
- Suitable for challenging designs and complex formwork

High Performance

- Excellent strength characteristics
- Full compaction means increased durability
- Reduced noise and health & safety issues
- Enhanced workability and excellent early strength

Cost Effective

- Reduced labour required for placing, levelling and finishing
- Reduced equipment requirement
- Rapid placement and elimination of finishing works.
